Product Charging Instruction

The product is usually arrived with 70% charge: However, before using, please fully charge it first by following the instructions as below:

1. Take the micro USB charging cable out from the box
2. Connect the USB charging cable to any USB plug adapter with a **5V output** i.e. a smartphone charger or a USB port on the computer.
3. Gently connect it to the charging port on the product.

ATTENTION: IMPORTANT

Please make sure the micro USB is facing the right direction before connecting it to the product. Do not force the micro-USB into the charging port if it is in the wrong direction as it may cause damage to the fragile charging port.

Charging Indicating Light

The indication light will light up red when charging.
After fully charged, the indication light will turn off.

USB Charging Port

The top side of the Micro-USB is smaller than the bottom side.

Light Mode Option

- The Smart Baton Light has two light modes.

1. **AUTO** : Light up only in the dark when it detects any motion
2. **ON** : Turn it on manually and permanently stay on.

Please choose the mode that works best for you.

For energy saving purposes, we recommend it to be used in **AUTO** mode.

Light stays on when it's manually switched on

Light is switched off

Light turns on in the dark only when it detects motion

- AUTO Mode

When in AUTO mode, the baton light will automatically light up when it detects any motion in the dark. The motion sensor area as per the left diagram.

What is the Baton Light Made Of ?

We care for the environment as much as you and providing something which is sustainably designed and made is also our key product philosophy to our business.

The Smart Baton Lamp is made of natural and sustainably sourced walnut or white ash wood with recyclable frosted acrylic glass. The wood and acrylic glass on some units of this product might also be from the recycled source.
