2021 New Product Catalog

The year 2020 has been a year of huge changes, uncertainty and worrying times.

We want to express our greatest respect to the frontline workers and key workers and we share our deepest condolences with lives and businesses lost. Meanwhile, we are extremely grateful for the continued support from our customers.

We wish 2021 will be better and brighter; like all our New Products, that we hope they will bring joy and 'light' into people's hearts.

our story

Gingko was founded in Oxford, England by Paul Sun and his wife Natalie Sun in 2011. In the same year, we got married and had the objective of designing and creating high-end, yet stylish and practical products for home and design-led gifts. Today we're a leading UK business in the home and gift industry and we feel proud of our achievements so far. We're also proud parents of two gorgeous children.

We think that sometimes life can be complicated and technology too intrusive. Therefore by keeping our product lines simple, engaging as well as being aesthetically pleasing has kept us driven and inspired to create new products. Bringing a fresh approach to design and incorporating modern technology into everyday objects enforces the foundation of our ethos: escape the boring, design for a smarter life.

Design, Quality & Time is now our design ethos when every Gingko object is born. We give every item an ultimate stylish and elegant look in a minimalist design, sustainably produce it with passion and love in our best standard of quality, and produce it to last.

We're currently based in Kenilworth, Warwickshire, the Shakespeare's county, around 10 minutes away from Warwick and 2 hours drive from London City. We strongly believe that a united growth with our beloved customers is a better growth and we thrive on seeking and creating out of the ordinary for our customers globally.

tech and gadgets collection

There is always a cool gadget that the men would look for but we believe we have something here at Gingko that the men would fall in love with...

We're very pleased to introduce our Flameless Element Lighter as our first product for our Tech and Gadgets product category.

06
Element Lighter

element lighter

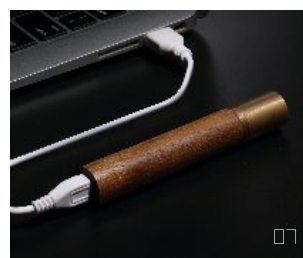

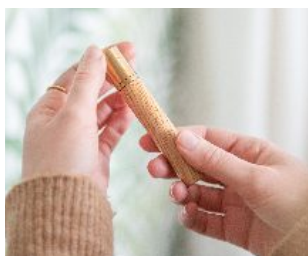

Not only smart in looks but smart in technology, the Element lighter from Gingko Design makes this not your usual average lighter.

Disguised in a cigar-like shaped tube, unscrewing the real copper top with a quick blow, it gently reveals a completely flameless heated metal ring that burns to a high temperature. After a few seconds it automatically turns itself off and you can simply screw the lid back on and enjoy its exceptionable quality and compactness. Encased in a real natural walnut or white ash wood and complemented by it's gold metal top lends to a smooth and luxurious feel.

In a class of it's own, it certainly gives your lighter experience a whole new lease of life.

It could be one of the most luxuriously finished flameless lighter
you have ever seen

element lighter

Technical Features

- a luxury Flameless wind-proof lighter -
50 times usages after a full charge
- Power source: in-built rechargeable 170mAh li-on battery -

Smart Moon Lamp

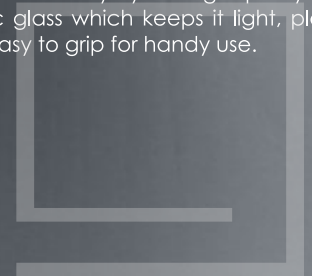

smart baton light

The Smart Baton Light is purely a sleek and modern compactly designed object.

It can be positioned absolutely anywhere you desire. The real natural and sustainable adhesive wood base can be fixed to most surfaces, and with a cleverly hidden magnet inside, the light baton can be easily positioned, taken down and even used as a handy portable torch. You can re-charge it as needed and simply place it back onto its magnetised base. Light up a dingy hallway, on a stairwell, a cupboard or even as bedside lights, without the need for complicated wiring.

The Baton light also has an in-built motion sensor to help conserve even more energy. So when it's dark, it automatically lights up the moment it detects any motion. Or if you prefer, you can certainly have it stay lit up.

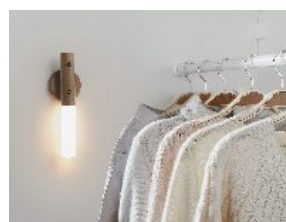

Without compromising on design, the Smart Baton Light from us has a real wood case set off beautifully by the high quality frosted acrylic glass which keeps it light, pleasant and easy to grip for handy use.

Smart Baton Light is an absolute stunning design that can fit in any space for any lighting purpose.

Simple, compact but elegant ...

smart baton light

 - Product gross weight: 186g -
 - Packed in a premium gift box -

G016AH - White Ash Wood

G016WT - American Walnut

smart vase light

Often the simplest of design creations can make the biggest impact and the brand new Smart Vase Light from Gingko no exception to this role.

The Smart Vase Light is a stunning and beautiful paper oval-shaped table light and will certainly create your perfect centrepiece for your home or office space. Cleverly hidden inside is a heat and water-safe tube for filling with your favourite flowers. Made with special heat-safe and water proof Tyvek paper that emits a warm ambient light from within, the fan-like design can also be folded for easy storage. To open again, simply pull the lamp back around till the magnets touch together.

The Smart Vase Light designed from us is a perfect space-saving home or office accessory whilst adding a big design impact and it also reflects our philosophy of creating a stylish and premium design to our every day life from our every day object.

The Simplest design makes the greatest impact

Living, inspiring and exciting ...

smart vase light

- USB charging Cable and Water Tube Included -

G018BO - White Bamboo

G018WT - American Walnut

smart diffuser lamp

The Smart Diffuser Lamp isn't just any other diffuser lamp.

With a copper plate seamlessly integrated on top of the lamp, it gently heats up to silently and slowly diffuse your chosen essential oil, filling your room with your favourite scent whilst adding an ambient warm light to create a cosy and relaxing atmosphere. The handy copper touch sensor built into the wood lets you easily control the light's 3-level brightness and the option to switch on the oil diffuser at the same time.

It's made of 100% natural sustainable wood coupled with a high quality frosted acrylic glass that's comfortable to touch. Also, due to its great portable feature via an in-built rechargeable battery makes it the perfect accessory for any room setting.

The Smart Diffuser Lamp from Gingko Design can certainly help you to relax while it radiates its beautiful light as well as its pleasant aroma. It also reflects our design ethos of making every day objects better and smarter.

The Smart Diffuser Lamp helps you to relax while it radiates its beautiful light as well as its pleasant aroma.

 - Product Weight: 290g -
- USB charging cable included, **essential oil not included** -
 - Packed in a premium gift box -

G017AH - White Ash

G017WT - American Walnut

octagon one plus

Portable Alarm Clock Desk Light

The New Octagon One Plus Desk Lamp inherited the same elegant design of our global multi-award winning Octagon One Desk Lamp, but it's now incorporated with our popular Click Clock in the hexagon base and made of 100% sustainable natural wood.

This smart design isn't just simply combining the best of simplicity and natural material to achieve its modern industrial aesthetic, but has also solved our everyday space-saving dilemmas, by creating an alarm clock and light into one sculptural-like unit. Leaving space for the more important things in our lives..

With a digital modern clock face built in the hexagon base, you no longer need a separate alarm clock by your bedside table. The clock display silently "fades away" from the wood surface while it's quiet and only reappears again if you give a gentle touch or a tap of the beside table. Plus, you can choose to either use the light to wake you up, so the light will gradually 'light up' your day or you can use the normal beep alarm if you wish.

The Octagon One Plus is more than a purposeful yet organic design, but also as a warm addition to any desk, room or office space.

It's not just a lamp simply combined with a clock,
It's a sculptural unit created from natural material with modern technologies.

octagon one plus

Technical Features

- touch sensitive control button on the base for power control and brightness adjustment -

G012CH - American Cherry

G012BO- Japanese Bamboo

G012WT - American Walnut

smart moon lamp

With this extraordinary levitating Smart Moon Lamp from Gingko, you could light up your whole world.

This gravity-defying moon lamp seems to magically 'float' above a walnut or white ash wood base and slowly rotates just like the real elliptical orbiting moon. Made with safe PLA material, this 3D printed full moon even has a textured surface just like the moon's own craters and glows an ethereal-like light as it emits its cool white light. Suspended by a strong built-in magnet it creates a fascinating and life-like illusion of the real thing.

Plus, the Smart Moon Lamp also has three different light modes for you to choose, so you can switch to your preferred light colour from warm yellow light, cool white light and warm white light by a simple touch on the wood base.

This amazing levitating Smart Moon Lamp from Gingko certainly reflects our design ethos of making every day objects premium and smarter in living.

You could also light up the whole world ...

Inspiring, Living, Fascinating

smart moon Lamp

Technical Features

G019AH - White Ash

G019WT - American Walnut

design led clocks collection

We're all slaves to time. However, we can decide when we would like to make a change of how our time should show up and be displayed.

Combining functionality with an aesthetic appeal, our clock collection has something to really inspire and please you. From our Gift of the Year Winner Flip Clock Clocks, to our classical best selling original cube Click Clocks, they're all good enough for you to start making a change.

26
Tumbler Click Clock

tumbler click clock

The new Tumbler Click Alarm Clock from us is a modern variant of any traditional alarm clock. Made of natural sustainable walnut, bamboo or cherry wood and with its beautifully carved round shape and no-tilt design, the Tumbler Click Clock is decorative, practical, and fun to interact with.

Incorporated with our classical and popular 'click-clock' sound activated LED display, the digital numbers feel like floating on the wood surface. You can set the display stay on permanently or only light up as a response to a gentle touch, tap, click of your fingers or clap of your hands. What's more, when the alarm goes off, you simply just give a gentle push to snooze; and, to turn it off, just turn it upside down.

It is a fabulously decorative object due to its architectural design but it's also extremely useful either on your office desk, next to the bed, or in the kitchen, sitting room or lounge.

The Tumbler Click Clock designed by us reflects our design ethos of applying natural sustainable materials and good craftsmanship whilst embodying beauty and technology, and, most importantly, we want our designs to outlive the fleeting trends.

With the no-filt design, the Tumbler Click Clock is decorative,
practical, and fun to interact with.

to snooze, simply just give a gentle push ; to turn it off, just turn it upside
down.

tumbler click clock
